

**Utah Division of Water Quality**  
Salt Lake City, Utah

**ADDENDUM**

**Statement of Basis (Wasteload Analysis & TMDL)  
Level I Antidegradation Review**

**Date:** November 24, 2008  
**Facilities:** Western Energy Operating [UT0000035]  
**Receiving water:** Union Irrigation Canal

**Finding of No Significant Impact – Negative Declaration**

The discharge from the above listed facility was evaluated for impact to its receiving water.

It has been determined that this discharge will not cause a violation of water quality standards (Utah Water Quality Standards, R317-2 Utah Administrative Code) in downstream receiving waters. Therefore, a wasteload allocation based upon water quality numeric criteria is not required.

Other permit limits should be set according to rules found in R-317-1.

**Antidegradation Level I Review**

An Anti-degradation Level II review is not required since the water quality will not be lowered by the proposed activity ( e.g., a discharge to a dry wash where the effluent will not reach a stream or river; or, a UPDES permit is being renewed and the proposed effluent concentration value and pollutant loading is equal to or less than the existing effluent concentrations value and pollutant loading). [R317-2-3.4.1b.1]
